

WND A300 WASHING & DRYING MACHINE

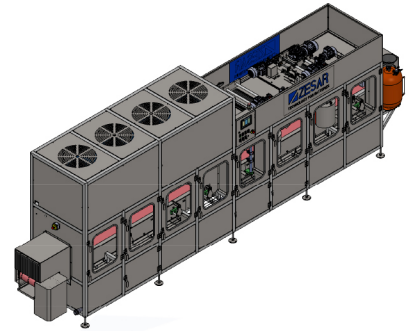

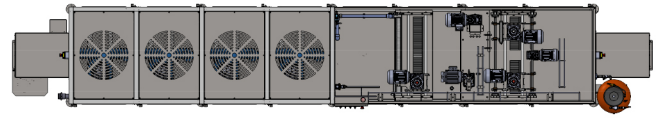

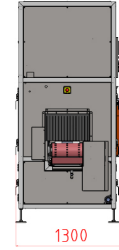

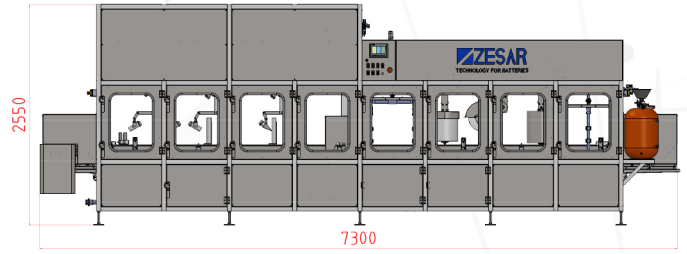

Efficient Production and High Productivity
Fast dry with High Capacity
Up to 6 batteries/minute
Automotive batteries from 36Ah to 240Ah

FINISHING LINE

Washing and Drying Machine is designed with the aim of decontaminate the acids left on the battery. Provides a thorough cleaning on the battery with the help of the rotary brush system. Also by the high-capacity fans, allows to clean up and dry the surface without leaving water/chemicals etc. on the battery

- Stainless steel oven belt with tensioning system
- Eight access doors for maintenance
- Triple sided drying
- Stainless steel structure
- Four station to optimal washing, rinsing and drying of the battery.
- For all automotive batteries
- Significant energy saving

OPTIONAL FEATURES

Gas and the Electrical water & air heating

CAPACITY

Up to 6 batteries / minute (L2 Type)

REQUIRED LABOR

None

OPERATIONAL RANGE

For automotive batteries from 36Ah to 240Ah

SIEMENS PLC system

FESTO Pneumatic System

SIEMENS Motors

Installed Consumption: 25kW

Pressured Air: 6 Bar

Air Consumption: 200 litres/hour

Tank: AISI 316L Stainless Steel

Color : Stainless Steel
